

Track Record

Oil & Gas

IQIP draws on a long history of designing, constructing, delivering and maintaining a range of offshore technology for various applications in the oil and gas market. As a reliable partner, we cooperate closely with our customers to provide a complete package of rental equipment and services for any type of offshore installation, from subsea infrastructure in ultra-deep waters, mooring of FPSO's to jackets in shallow water.

IQIP's proven track record demonstrates the reliability of our services, which allows you to focus solely on our core business.

Track records of 2012 and older are available on request.
